PROFILE

Software engineer building backend systems and data-intensive platforms. Experience across Java/Spring Boot services, registry integrations, relational data models and Python/PySpark data processing at Vertoz Limited.

TECHNICAL SKILLS

Backend & integrations: Java, Spring, Spring Boot, REST, SOAP, Spring Data JPA, JWT

Data & event processing: Python, Go, PySpark, Kafka, Parquet, HDFS, Hive, Impala, Vertica, Superset

Persistence & data models: MySQL, Redis, MongoDB

Machine learning: PyTorch, Python, Flask, AWS EC2

Supporting tools: Git, Docker, Jenkins, AWS S3, Angular, Tailwind CSS, Bootstrap

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Vertoz Limited

August 2025 - present | Product: ConnectReseller

- Contributed to modernizing a legacy Spring application into Spring Boot microservices, including API Gateway routing, authentication and business/domain services.
- Built REST APIs and registry integrations using REST and SOAP, with consistent response contracts and domain lifecycle, nameserver and glue-record workflows.
- Normalized MySQL schemas and improved foreign keys, indexes and queries; built paginated and filtered endpoints with Spring Data JPA.
- Implemented Kafka-based asynchronous notification workflows.
- Developed JWT-based hierarchical impersonation with stack-based identity transitions, relational role/feature/user mappings and permission-aware navigation.
- Implemented database-driven registrar routing and request/response normalization; communicated with clients to clarify requirements.

Data Engineer Intern | Vertoz Limited

June 2025 - August 2025 | Data engineering across multiple products

- Wrote scheduled Python jobs to ingest endpoint JSON and insert or update database rows.
- Reworked applicable Bash/Impala-oriented batch workflows with PySpark and Vertica, processing date-partitioned Parquet, aggregating data and normalizing location fields.
- Optimized database writes and PySpark/JDBC execution; built Apache Superset analytics backed by Vertica.
- Worked on Go website-activity ingestion, device/geolocation enrichment and Kafka event production.
- Updated PySpark streaming transformations and Parquet output, including fixes for missing or incorrectly transmitted fields.
- Changed a Java analytical data-access path involving Vertica and Redis to reduce reliance on Impala.

PERSONAL PROJECT

MedLeaf | 2025

PyTorch-based flora identification and medicinal value assessment. Data cleaning, preprocessing, model development, hyperparameter optimization and evaluation; Flask REST prediction APIs deployed on AWS EC2.

Project-reported model accuracy: 82%. Evaluation split and dataset details are not published; medicinal information is a project feature, not clinical guidance.

EDUCATION

Bachelor of Engineering in Computer Engineering | 2025

Vivekanand Education Society's Institute of Technology | University of Mumbai
Overall CGPI: 9.45/10.0

Diploma in Computer Engineering | 2021

Vivekanand Education Society's Polytechnic | Maharashtra State Board of Technical Education
Percentage: 94.97%

SELECTED COURSEWORK

Java Spring Framework 6 with Spring Boot 3 with Telusko - Navin Reddy | Udemy

2023-24 Tableau Certified Data Analyst Training - Jed Guinto | Udemy

The Complete 2023 Software Testing Bootcamp - Tarek Roshdy | Udemy
